Abstract (en)  
[origin: WO2006081461A2] The invention provides a reading stand or document holder to support a document for review by a user. The reading stand may include a base portion including at least one aperture to allow the user to grasp the reading stand, as well as a platform portion for supporting the document. The platform portion is hingedly connected to the base portion. The platform portion includes at least one page holder for retaining the document upon the platform portion. Further, the reading stand includes a prop member. The prop member extends from a backside of the platform portion. The prop member is adapted to engage with the base portion so as to support the platform portion in an angled position.
