Abstract (en)

[origin: WO2006084812A1] The invention relates to a toaster (10) having a housing (12), at least one vertically oriented toasting compartment (72, 144) which is accessible via at least one upper opening in the housing (12), a toastable-item holder (72, 144) for holding a slice of bread that is to be toasted and which can be moved between a removal position and a bread slice toasting position, and a magnetic retainer device for retaining the toastable-item holder (72, 144) in the toasting position. The magnetic retainer device has a cylindrical electrical coil (128) and an iron core (134, 148, 152) that is displaceable within the cylindrical electrical coil (128).
