Abstract (en)  
[origin: DE102005008840A1] The seat has a backrest (3) arranged at a support (2), and a headrest (4) arranged at the backrest and adjustable in a direction. A gap (8) is formed between a lower limit of headrest and the upper limit of backrest, based on the position of headrest. A covering device e.g. wind deflector, is connected with the headrest/backrest, such that it is adjusted during a vertical adjustment of the headrest/backrest. The headrest is arranged with a distance to an upper limit of the backrest.
