Abstract (en)

[origin: WO2005051802A1] The invention relates to a aerosol can comprising a body containing one type of propellant agent and aerosol product, a valve (5) whose activation enables to spray said aerosol product and a spray head (1) for releasing the product to environment by actuating the valve. The product spraying speed of the inventive aerosol can is adjustable by an adjusting device provided in the spray head (1). Said invention is mainly used for aerosol varnish cans taking into consideration that for such applications it is necessary to have a controlled and uniformed spraying speed in order to avoid varnish defects.
