Abstract (en)
[origin: WO2006086911A1] The invention relates to a flock storage for a card with a reserve shaft and with a feeding shaft, the reserve shaft being connected to an air-permeable surface, and an opener module with a draw-in roller or feed roller between the reserve shaft and the feeding shaft. The invention is characterized in that the flock storage space formed by the reserve shaft has a height of at least 900 mm above the horizontal plane that contains the axis of the feed roller.
