Abstract (en)

[origin: WO2006084300A1] The inventive seal profile for sealing joints between laid covering plates (2) comprises a base body (1, 18) made of an elastomer material, wherein said seal profile in the cross-section thereof is provided with a projection (10, 10') which is embodied on each side and whose lower end is oriented towards the ground (5). According to said invention, the projections (10) are made of an elastomer material and the lower surface (11) of the base body is provided with a groove or notch (12) which is upwardly oriented and embodied therein.
