Abstract (en)
[origin: DE102004062123B3] The method involves conveying a message to a partner in a suspendable sea-area or to a sea-area buoy (13). The transmission of a message is provided from the partner to air or a land-based partner the message being fed into the buoy (13). The buoy is suspended in the water and a message is wirelessly called to the emerged buoy. The call message is provided after the buoy emerges. An independent claim is included for a buoy.
