Abstract (en)
[origin: EP1852035A1] Deodorant system comprises a container (20) for receiving deodorant residual material (16) and a stamp for pressing out the residual material from a segmented guide (14) into the container from which the material can be pressed. Preferred Features: The dimension of the inner hollow chamber of the container corresponds to the segment opening (18) of the guide. The container has a cover (22) with openings from which the residual material can be pressed.
