Abstract (en)

An image handling apparatus is disclosed, including an operation panel (202) displaying an input screen allowing to input image handle information for handling an image based on display control information received from an external apparatus capable of connecting through a network, and receiving an instruction of an image generation, and hardware resources (111) for generating an image. The image handle information input at the input screen is transferred to the external apparatus. The image handling apparatus includes an image generation controlling part receiving and parsing image generation information for at least one of the hardware resources (111) to execute an image generation based on the image handle information, from the external apparatus in response to an instruction of the image generation, so that at least one of the hardware resources (111) executes the image generation.
