Abstract (en)

The piece has a rack (100b) comprising a hour toothed sector (106), a free denture space (104) and a minute toothed sector (102) along one of external edges of the rack, where the sectors are situated in different planes. The hour toothed sector and the minute toothed sector are positioned at the level of lower and upper pallets, respectively. A spring (108) is situated at proximity of the toothed sectors and exerts a pressure at the level of the free denture space. An independent claim is also included for a timepiece comprising a minute repetition mechanism.

Abstract (fr)

L'invention concerne un mécanisme de sonnerie pour mouvement de pièce d'horlogerie comprenant au moins un organe sonore (32) capable d'émettre au moins deux sons de fréquences différentes, au moins deux levées (36) et au moins deux marteaux (34) destinés à être mus par lesdites levées (36) pour frapper ledit organe (32).
