Abstract (en)

The apparatus (35) has front and rear lateral surfaces extending from two main surfaces, where the rear lateral surface includes a maintaining unit in an envelope, and the front lateral surface (39) has a visual marking unit (40) e.g. pilot lamp. A store of marks including visual marks (42, 42²) is placed in the marking unit. The main surfaces provide access to the store of marks for selecting one visual mark that is visible in the marking unit.

Abstract (fr)

L'appareil électrique modulaire comporte un organe de repérage visuel (40) et un magasin de repères comportant une pluralité de repères visuels (42') adaptés à être mis en place dans l'organe de repérage visuel (40).
