Abstract (en)
[origin: WO2006087032A1] A dilatative percutaneous tracheotomy device (10). The device (10) includes a cannula (4), and elements for converting the cannula (4) from a contracted position to an expanded position. The cannula (4) is a shape-memory cannula (4), and is convertible from the contracted position to the expanded position using the intrinsic characteristics of the materials of which it is made.
