Abstract (en)

[origin: WO2006079568A2] The invention relates to the use of an effective amount of at least one 3-sulfanylpropanamide compound of formula (I) or a salt and/or solvate thereof : (I) in which: a) R₁ and R₂ independently represent: a hydrogen atom; an optionally substituted C₁-C₂₀ alkyl radical; an optionally substituted, saturated or unsaturated hydrocarbon-based ring; b) R₃ represents: a hydrogen atom; an optionally substituted C₁-C₂₀ alkyl radical; an optionally substituted saturated hydrocarbon-based ring; in a cosmetic composition for caring for and/or making up keratin fibres, especially human keratin fibres, to induce and/or stimulate their growth, to stop their loss and/or to increase their density. The invention also relates to novel 3-sulfanylpropanamide compounds and to compositions containing them, which are intended to increase their density of keratin fibres and/or to improve their appearance and/or to reduce their canities. The invention also relates to a cosmetic treatment process which is intended to stimulate the growth of keratin fibres and/or to stop their loss and/or to stimulate their pigmentation and/or to limit their depigmentation and/or bleaching.
