Abstract (en)
[origin: WO2006092521A1] The invention essentially concerns a device (1.1) for a motor vehicle power transmission. Said device (1.1) comprises a traction chain consisting of a heat engine (2), a clutch (3) including first and second clutch discs (8, 9), an electrical machine (4), and wheels (6). The shaft (10) of the machine (4) is further connected to a shaft (12) of the wheels (6). The invention is characterized in that said transmission device (1.1) comprises a starter system (7) mechanically independent of the electrical machine (4). Said starter system (7) is connected to the heat engine (2).
