Abstract (en)

[origin: WO2006091189A1] Provided are compositions comprising a hydrophobically-modified acrylic polymer, sodium trideceth sulfate, and one or more particles suspended therein having unexpectedly high stability. Also provided are methods of suspending at least one particle comprising combining at least one particle with a hydrophobically-modified acrylic polymer and sodium trideceth sulfate to produce a composition comprising the hydrophobically-modified acrylic polymer and sodium trideceth sulfate in which the at least one particle is suspended.
