Abstract (en)
[origin: WO2006089321A1] The invention relates to a highway safety device, comprising uprights (71) arranged along the edge of a carriageway and a safety device (2) fixed to the uprights (71), running between the same. The safety device (2) comprises a longitudinal profile (4) and at least one elastic spacer element (72) arranged between the upright (71) and the longitudinal profile (4). The longitudinal profile (4) comprises a longitudinal extension and a width (7) perpendicular thereto.
