Abstract (en)
[origin: WO2006092276A2] Disclosed is a functional plumbing unit which is embodied as an insertion cartridge (2) that is to be inserted into a liquid conduit (3) of a discharging plumbing fixture (4) while comprising a housing (5), a jet regulator, and an attachment screen (9) located at the inlet end. The housing (5) is configured monolithically with a perforated plate located at the discharge end as part of the jet regulator and supports an external thread (10) on the outer face thereof, said external thread being screwable into an internal thread (13) of the discharging fixture (4). A ring seal (12) is disposed adjacent to the external thread (10) at the discharge end. The length of the housing (5) is dimensioned essentially for arranging the external thread (10) and the adjacent ring seal (12). A jet-splitting part (7) that can be joined to the housing (5) and is provided with a monolithically connected, additional perforated plate (8) and holding elements for fastening the attachment screen (9) is placed at the inlet end as part of the jet regulator.
