Abstract (en)

[origin: WO2006087300A1] The invention relates to methods for sealing a hollow space, in particular in a building sector consisting in fixing a tubular hollow body provided with at least one opening to said hollow space, in filling said hollow body with an expandable product through one or several openings and in closing said opening(s). A system for sealing a hollow space by means of a hollow tubular body filled with an expandable product and provided with at least one closable opening and with the aid of means for fixing said hollow body is also disclosed.
