Abstract (en)
[origin: US2006200736A1] A method of transmitting digital contents of a content provider to the user of a content transmission system in a computer communications network in which a data set with a certain digital content desired by a download user is transmitted at least in part from a terminal of an upload user over a computer communications network to the terminal of the download user. For this purpose from terminals of different upload users fragments of the data are transmitted to the terminal of the download user.
