Abstract (en)

[origin: EP1854571A1] Invention relates to a submerged entry nozzle (21) for the thin slab casting comprising a divider (14) having a geometry of the ogival type, continuous contours and an angle α at the vertex comprised between 30° and 60° . The divider in its lower portion is narrowing symmetrically with its sides (15,15') towards the median vertical axis (13).
