Abstract (en)

[origin: EP1854691A1] A bus or tram (1) is supposed to have a low floor in order to facilitate a convenient entering of passengers in wheelchairs or people pushing a buggy. The area (5) bridging the gap between two segments (2,3,4) of the articulated vehicle (1) is fitted with a movable joint with a turntable on top and covered by vertically positioned pleated rubber walls. The turntable is inserted in an inclined position joined with one side to the floor of one of the vehicle segments (2,3,4) and with the opposite side to an elastic element.
