Abstract (en)
A telescopic walkway for boats with integrable and entirely foldaway structure, of the type suitable for extending between at least one portion (1) of stern platform (52) of the boat and at least one mooring quay or wharf (2), comprising at least one profile (54), having substantially parallelepiped section and contained inside the stern platform (52), which can be actuated to lift by means of a plurality of cylinders, possibly coupled with plunger pistons, or by means of a pantograph system; inside the parallelepiped profile (54) at least one ladder (51) is contained, able to slide horizontally and orientable upwards and downwards, which can be used both to go into the water and for mooring on the quay or wharf (2).
