Abstract (en)
[origin: EP1854929A1] The invention relates to a drain for discharge of a liquid, in particular water, to for instance an outlet pipe, which drain comprises an inflow opening, an outflow opening for connecting to an outlet pipe and an air trap arranged between the inflow opening and the outflow opening, which air trap comprises a reservoir open on the top side for collecting liquid flowing along the inflow opening and at least one overflow channel running over the top side out of the reservoir for discharging liquid from the reservoir to the outflow opening, wherein a part of the overflow channel is at a higher position than the inflow opening of the drain. The invention further relates to a gutter comprising an elongate receptacle of substantially U-shaped cross-section and a drain according to any of the foregoing claims arranged in the bottom of the U-shaped receptacle, wherein the inflow opening of the drain lies substantially flush with the bottom of the receptacle.
