Abstract (en)

[origin: EP1854939A2] The system has wood linings (7) provided with rabbets (8) for integration of isolating closures (9). Fixation nails (12) are arranged on concrete structural floors (4) through the closures, and an isolating sheet (10) is integrated in a lower face of the linings at a surface in contact with the structural floor, and the fixation nails do not come in contact with the lining material. The isolating sheet determines a surface equal to that of the lower face of one lining.
