Abstract (en)

[origin: WO2006087444A1] The invention relates to a tip for a sampling pipette, the end part of which (2) essentially takes the form of a truncated cone or a cylinder in which a sampling cone (3) is inserted. The invention is characterised in that the aforementioned end part comprises at least two annular flanges (5, 6), whereat the diameter of said end part (2) diminishes in the direction of the lower end (8) of the tip. The invention is further characterised in that the flanges provide a reduction in the diameter of the end part (2) of between 0.2 and 2 mm and, preferably, between 0.3 and 1.8 mm. The invention also relates to a sampling pipette which is equipped with said tip.
