Abstract (en)
[origin: WO2006064297A1] The subject of the invention is a method for surface decoration of woodwork products. With the help of this solution aesthetical, durable decorations, inserts, inlays can be set into the slots and hollows of the surface of woodwork products for example in parquets, respectively in miscellaneous wood panel materials, furthermore in furniture and furnishing objects made of wood. During the method according to the invention a slot is created in the surface of the woodwork products by cutting, and surface-cleaning and slot-cleaning is performed on the product, then a transparent material is fitted into the slot formed this way to set there, and the surface formed this way is provided with a sealing layer after polishing, and is lacquered. The method according to the invention is characterized by that, a clutch material is set into the slot formed in the surface of the woodwork product by cutting after surface and slot cleaning, then the surface of the clutch material in the slot is preferably colored on places and ways required, then the slot is filled with a transparent material and then it is polished and after providing a top sealing layer, a final lacquer layer is applied.
