Abstract (en)
[origin: WO2006094470A1] The invention relates to a manually movable scissor lift cart (1) comprising a chassis (5), a pushing device (2), and a platform (6) for supporting loads. The platform (6) is disposed so as to be vertically adjustable by means of a powered scissors-type support mechanism (17). The invention is characterized in that the platform (6) and the scissors-type support mechanism (17) are incorporated in a frame (18) which is mounted so as to be movable about a horizontal axis (29) on the front side (26) of the chassis (5) while said frame (18) is supported by vertically adjustable bearings (11) that are arranged on the chassis (5). Furthermore, the rear side (20) of the chassis (5) is provided with an opening (28) which extends upward from the floor and is wider than the forward area (27) of the chassis (5) and wider than the width A of the frame (18).
