Abstract (en)
[origin: WO2006089926A1] A packet (1) of cigarettes having a cup-shaped, parallelepiped-shaped outer first container (2); a first lid (4) is hinged to the outer first container (2) to rotate between an open position and a closed position; the outer first container (2) houses two to four inner second containers (18), each of which is cup-shaped, houses a group (19) of cigarettes, and is parallelepiped-shaped; a second lid (21) is hinged to each inner second container (18) to rotate between an open position and a closed position; and the inner second containers (18) are housed inside the outer first container (2) so that, when the first lid (4) is in the closed position, a top wall (30) of each second lid (21) directly contacts a top wall (13) of the first lid (4), and at least one lateral wall (29) of each second lid (21) directly contacts a lateral wall (12) of the first lid (4).
