Abstract (en)
[origin: WO2006087385A1] The invention concerns a fluid product dispensing device comprising a reservoir (10) containing the fluid product, a dispensing head (20) provided with a dispensing orifice (21), said dispensing head (20) being mobile relative to said reservoir (10) to dispense the fluid product through said dispensing orifice, and a removable protective cap (30) mobile between a closing position, wherein it covers said dispensing orifice (21), and an opening position, wherein it uncovers said dispensing orifice (21). The invention is characterized in that said device comprises locking means (40) mobile and/or deformable between a locking position, wherein they prevent the fluid product from being dispensed, and a releasing position, wherein they do not prevent the fluid product from being dispensed, said locking means (40) being moved and/or deformed into their locking position by said protective cap (30) in closing position.
