Abstract (en)

[origin: WO2006089941A1] The invention relates to a method and a system for the provision of data to a software application (700) of a controller (200), whereby data provided by a sensor (100) is processed in a data processing module (400, 500) and the software application (700) requests information required thereby from a central information provider (600), the above calling up the required data from a data processing module (400, 500).
