Abstract (en)

[origin: WO2006095110A2] The invention relates to a method of controlling an action using a measurement taken on at least one digital image (10) containing at least two colours (195, 196) and taken with an image capture device. The inventive method consists in: measuring (190) the relative sharpness between at least two colours on at least one region (R) of the image, and controlling (191) at least one action as a function of the measured relative sharpness.
