Abstract (en)
[origin: DE202005003878U1] The distributor arrangement has a holder (11) with functional strips (12) and several wire guide elements (13). The functional strips have frontal contacts for connecting incoming and/or outgoing cable wires and the wire guide elements have wire guide channels forming wire guide planes. The strips and guide elements are arranged in the holder in a sandwich arrangement. Cable wires of different users interacting with functional strips and in different wire guide planes and cable wires of different users interacting with the same strips and in the same planes are screened with respect to each other.
