Abstract (en)  
[origin: WO2006095216A1] The present invention is related to method and a system and related components for operating a communications device (22), which has first identity data associated to a first communications environment (2), in at least one further communications environment, wherein, in response to a request from the communications device (22) to operate the communications device (22) in a second communications environment (24), a central entity (46) communicates second identity data associated to the second communications environment (24) to the communications device (22).
