Abstract (en)

[origin: WO2006094783A2] The invention relates to a current supply device for a surface resistance heater, a heating system and to a method for supplying a surface resistance heater with current. The resistance of the surface resistance heater is measured in a continuous manner in order to detect short-circuits. In the event of a short-circuit, the current is limited or cut-off. Said current supply device is, preferably, embodied as a skirting board or as a cover strip.
