Abstract (en)
A plurality of pairs of opposed and vertically spaced guide rails (2) are provided on the right and left sides of frame rods (1) provided at the front and rear sides of a frame unit. Each guide rail has a cut portion (4) provided at an appropriate intermediate position on the lower side thereof. A free tray (11) adapted to be mounted on a pair of opposed right and left guide rails has projections (14) at appropriate positions on the right and left side ends of the bottom thereof. The projections are engageable with the cut portions of the right and left guide rails. Individual trays (15) are placed in parallel on the free tray. Each individual tray has a high side wall on one longitudinally extending side thereof and a low guide wall (17) on the other longitudinally extending side. Each individual tray has a mount (22) provided in a front end portion thereof and a slider (24) slidable along a longitudinal slot rail (21) provided in the center of the bottom thereof. A work-table plate (31) is fitted in table guides (6) provided on the lower side of a base plate (5) to which the bottom portions of the frame rods of the frame unit are secured.
