Abstract (en)

[origin: EP1857625A1] Support accessory (10) for a hinge (12) to articulate a mobile structure (14) with respect to a fixed structure (16), comprising a platelet (18), able to be attached to one of the structures (14, 16), and a hollow element (20), substantially tubular and disposed substantially perpendicular with respect to the platelet (18), and having a housing seating (25) for an attachment component (24) of the hinge (12). The platelet (18) and the hollow element (20), including a closing end (23) thereof, are of metal and made in a single piece.
