Abstract (en)
[origin: EP1857995A1] The device has a comprehensive outline e.g. a letter form having a box type luminous body (1), which is translucent with a limited surface (3,4), and a light source, arranged in the luminous body. The light source is formed by a light application (6), which comprises a support (7) consisting of translucent material with one of the comprehensive outline of the luminous body corresponding to contour, reduced in contrast and lined up along the support, in receiving elements (10) in illuminating diodes (9) resting therein for the similar illumination of the translucent limited surfaces.
