Abstract (en)

[origin: WO2006094003A1] The invention is directed to novel cathepsin C inhibitors and their use in the treatment of diseases mediated by the cathepsin C enzyme. Specifically, the invention is directed to compounds according to Formula (I): wherein X and n are defined below, and to pharmaceutically-acceptable salts thereof. The compounds of the invention are cathepsin C inhibitors and can be used in the treatment of diseases mediated by the cathepsin C enzyme, such as COPD. Accordingly, the invention is further directed to pharmaceutical compositions comprising a compound of the invention. The invention is still further directed to methods of inhibiting cathepsin C and treatment of conditions associated therewith using a compound of the invention or a pharmaceutical composition comprising a compound of the invention.
