Abstract (en)  
[origin: WO2006024122A1] A pharmaceutical composition able to induce a sustainable immune response, where this formulation is composed by polymeric biodegradable microspheres containing one antigen and one gene vector, associated or not to an adjuvant, where this formulation is capable of release the gene vector in a period inferior to the antigen release, and the release of entrapped material is sustained over a period not inferior to 30 days, and it is able to induce a specific immune response, cellular and humoral, after administration of one or several doses.
