Abstract (en)
[origin: WO2006097181A1] The invention relates to a handle (1) for a cleaning device. Said handle comprises at least one handle base (2) having at least one convex first handle section (3) and, axially adjacent to the first handle section, at least one concave second handle section (4). The invention is characterized in that the first handle section has a higher coefficient of static friction than the second handle section.
