Abstract (en)

[origin: WO2006097062A2] The invention relates to a heatable housing for a device for producing steam, with at least one wall that delimits an interior space, which is enclosed by the housing at least in areas and which serves to hold a liquid to be vaporized. The wall has at least one recess for accommodating at least one heating device. The invention also relates to a device comprising an inventive housing, and to a cooking appliance for producing steam with such a device.
