Abstract (en)

[origin: EP1698866A1] The present invention is related to a dosing system for adding a product to be dosed to a bulk product being discharged, comprising a dosing device (100) containing the product to be dosed, a first weighing unit (250) comprising a plurality of weighing sensors arranged for weighing the product to be dosed and a computer device (300) arranged for receiving weighing data from the first weighing unit and weighing data related to the bulk product and arranged for adjusting the discharge rate of the dosing device, based on the received weighing data.
