Abstract (en)

[origin: WO2006092354A1] The invention relates to an on/off switching system (1) comprising a rocker switch and a pushbutton (2) which is formed independently of the rocker switch. Said pushbutton (2) is resiliently guided and configured so as to act upon a rocker (6) of the rocker switch for switching on and off purposes while being located in the same position in an ON state and an OFF state.
