Abstract (en)
A rucksack has a pair of shoulder straps (112) attached to a back panel (110), and a ventilation unit (1) including upper and lower fixing panels (10,20), made of synthetic resin, a pair of supporting rods (30) installed between the upper and lower fixing panels, both ends being inserted into the upper and lower fixing panels; and a ventilation plate (50), made of a mesh, spaced from the back panel under the condition that the upper end of the ventilation plate is fixed to the upper portion of the back panel and the lower end of the ventilation plate maintains the elastic power of the lower fixing panel by bending the lower fixing panel in an arc shape using elastic fixtures (40) provided between the lower end of the ventilation plate and the lower fixing panel.
