Abstract (en)

[origin: EP1859720A1] The device has a front door (3) covered by a front panel (5) and at least one signal light (6) for illuminating a surface adjacent to the appliance, whereby the signal light is configured to produce a signal that is visible to the user when the front door is closed. The signal light is configured for the illumination of at least part of a gap to the side of the front panel. An independent claim is also included for a combination of a domestic appliance and the adjacent furniture item.
