Abstract (en)

A pharmacological product (1) comprising: a container (2) in the form of bipartite bag, having a first (21) and a second (22) separate housing, arranged side-by-side; a first opioid (31) received in the first housing (21); and a second NSAD - Non-Steroidal Analgesic Drug - (32) mixable with the first one (31) and received in the second housing (22), wherein the container (2) further has a dividing septum (23) of the first (21) and second (22) housing, apt to be permanently torn by exerting a pressure externally to the container itself (2) so as to interconnect the first (21) and the second (22) housing and cause a mixing of the respective active principles (31, 32) within the container (2) (Figure 1).
