Abstract (en)

[origin: EP1859938A2] The device (5) has a brush roller (6), a spray doctor blade system (7), which is engaged in the brush roller. The blade system has a channel (10) for a washing agent and another channel (11) for water. A carrier is made as a single piece bent part for supporting the blade system. The blade system is removable together with the carrier from the printing machine. The carrier is detachably connected with the blade system. The channels are designed by two pipes (8, 9), where one of the pipes is connected directly with another pipe.
