Abstract (en)

The method for wrapping palletised loads comprises the following phases: arranging a first and second swivel platforms to receive a palletised load and a covering film reel moving machine to work together with both swivel platforms; depositing one palletised load at a time on said first swivel platform; depositing one palletised load at a time on said second swivel platform; wrapping, alternately, a palletised load deposited on the first swivel platform and one on the second swivel platform by means of the co-ordinated movement of the reel of film, carried by the moving machine, and the rotation of the palletised load placed on the swivel platform; moving said palletised load away from the first and second swivel platforms.
