Abstract (en)

[origin: EP1860154A1] The present invention relates to a thermoplastic resin composition which contains a plasticizer having flexibility, high transparency, little bleed out and high extraction resistance to a paraffin solvent, particularly an aliphatic polyester resin composition, anda sheet, film, ormoldedproduct molded from the same, and characterized that said aliphatic polyester resin composition contains a compound (A) of 1.0 mass part to 100 mass parts expressed by the following formula (1) as a plasticizer to an aliphatic polyester of 100 mass parts.
