Abstract (en)
[origin: EP1860250A2] The seal has a bar section (2) including two lower cross-units (2a, 2b) and two flexible plastic sections (1), where the bar section is in the form of a hat section. The plastic section is attached at the cross-units of the bar section. The plastic sections have a glass sealing side (12) and an opposite support section sealing side (14) designed extensively with a support section sealing function. A side of the plastic section is a fastening side (16) for the cross-units and faces the cross-units, where the side of the plastic section is adjacent to the sealing sides. Independent claims are also included for the following: (1) a method of manufacturing an attachment seal (2) a facade system with a sealing system.
